Coffee Guardian Coffee Filtration Options ST2, ST4, ST8

ST2 COFFEE MACHINE WASTE FILTER

The ST2 is a filter for industrial coffee machines, specifically designed to treat the waste flow of the backwash before going to the drain. Coffee grinds are strained through an ultra fine mesh sock.

The ST2 is easy to fit, comes with pipe fittings and wall brackets for easy installation. The ultra fine sock filter can be used to strain the grinds.

ST4 & ST8 UNDERSINK COFFEE FILTERS

The ST4 and ST8 coffee waste filters can be installed under sinks used in cafes to strain coffee grinds and other fine sediment. The under-sink option can take the waste from the sink as well as the coffee machine itself.

With the ST8 floor mounted trap, several filtration methods are available to choose from including, mesh bags, ultra fine mesh socks and stainless steel basket options.

Maintenance is easy. Once a day or when a reduced flow is noticed from the sink simply open the tank and remove the filtration device, empty and replace.

Model	Length (A)	Height (B)	Inlet/Outlet (C)	Width (D)	Basket (E)	Capacity	Options
Inches					Clearance	Litres	
ST4	255	330	50	255	250	4	Coffee
ST8	305	405	60	300	350	8	Basket/Coffee/Bag
