SINK GUARDIAN ST1

Installed into the sink itself, the Sink Guardian drain protector stops most food waste entering the pipes. The Sink Guardian comes with an inbuilt filtration system encompassing a removable prefilter, removable basket filter and third permanent filter for triple protection. Easy to install and easy to maintain the Sink Guardian will keep your pipes free of foodwaste build up.

FLOOR STANDING FOOD GUARDIANS ST8-ST23

The ST8, 12 and 23 litre Food Guardian Sediment Traps will dramatically reduce the amount of food waste allowed down the drains. By installing a Food Guardian not only will pipes be protected but the loadings on any grease trap will be greatly reduced. The ST traps can be installed under sink or in a basement and are recommended in any food service outlet.

Simply install the Food Guardian and empty the basket when full into your food waste bin or compactor.

Unit	Length (A)	Height (B)	Inlet/Outlet (C)	Width (D)	Basket (E) Clearance	Capacity Litres	Inlet/Invert	Outlet/Invert
